Languages

Native:
Spanish

Others:
English (Advanced)

Profile

I have been working as a technology consultant, being involved in varied J2EE, AngularJS and NodeJS projects. At the beginning, I focused on the Back-End side, especially persistence of data, integrating external systems and background processes. But lately, I am involved in all release management processes and ensure the quality and security of the infrastructure and applications.

Education

Sep/2006 - Sep/2012 **Computer Engineering (EINA)**
University of Zaragoza, Zaragoza (Spain)

Project Thesis: Design and implementation of an hierarchical, scalable and fault tolerant P2P network layer. (Jan/2012 - Sep/2012)

Sep/2009 - Jun/2010 **Erasmus Programme in Computer Science 4th level**
University of Glasgow, Glasgow (United Kingdom)

Work Experience

Jan/2016— **Software and Systems Engineer** at **Hiberus Tecnología**

- Install, configure, and monitor servers, repositories and databases.
- Manage all processes involved in continuous integration and continuous delivery.
- Execute full lifecycle software development.
- Technical support for team members and code review.

Jun/2015—Jan/2016 **Software Engineer** at **Nervia Consultores**

- Analysis and development of business processes for application needs.
- Implement and improve continuous integration processes.
- Advising and supporting team members.

Apr/2014 - Jun/2015 **Technical Analyst** at **Capgemini Spain**

- Advising on the implementation and improvement of internal processes.
- Service Management estimation and job scheduling.
- Participate in quality control, maintenance and testing phase.
- Analysis, design and implementation of the integration and security layer.

Nov/2012 - Apr/2014 **Web Developer** at **Capgemini Spain**

- *Analysis and development of new functionalities.*

Sep/2011 - Feb/2012 **Internship** at **Ingemetal Energías**

- Development of internal management applications.
- Management and maintenance of the network, servers, and user support.

Technology Summary

- **Languages:** Shell Script, Python, Java/J2EE, AngularJS, NodeJS .
- **Databases:** Oracle Server, PostgreSQL, MySQL, MongoDB.
- **Servers:** Apache Server, Nginx, Apache Tomcat, Oracle Weblogic.
- **Dev Tools:** SVN, Git, Docker, Jenkins, Sonar, JIRA, Trello.
- **Security Extra:** Kali Linux Distribution, OWASP Tools, Burp Suite.

Additional Information

I am passionate about security and new technologies, especially Pentesting and Ethical Hacking. I love to get involved in the security community, so I have attended some CONs like ConPilar, AlbahacaCon or ESET Security Days. I have taken a Workshop of Ethical Hacking (AlbahacaCon by Miguel Arroyo) and several cybersecurity MOOCs. I am also a CTF player and I am always looking for new challenges.
